The grant holder will benefit from health insurance, supported by INESC TEC.

### 2. OBJECTIVES:

Support in the development of laboratory infrastructure for microgrids integrating storage systems and real-time simulators;

Review of control strategies for hybrid microgrids that integrate different energy storage technologies;

Modelling of hybrid storage systems and development of control strategies.

### 3. BRIEF PRESENTATION OF THE WORK PROGRAMME AND TRAINING:

To develop competences in the area of microgrids by reviewing state-of-the-art related to the operation of microgrids and the operation of hybrid storage systems;

Support the development and consolidation of the laboratory test system for the AC/DC microgrid;

Support the development and integration of an energy storage system in the laboratory, considering integration not only with the laboratory's electrical infrastructure, but also with the real-time simulation system and the laboratory's monitoring and control system.

#### 4. REQUIRED PROFILE:

##### Admission requirements:

The awarding of the fellowship is dependent on the applicants' enrolment in study cycle or non-award courses of Higher Education Institutions.

##### Preference factors:

Knowledge of control strategies;  
Expertise in managing battery charging and discharging processes;  
Knowledge of the use of current and voltage sensors;  
Knowledge of the use of microcontrollers;  
Fluency in English (spoken and written).

##### Minimum requirements:

Knowledge in energy storage technologies;  
Academic expertise in power electronics;
